PRODUCT & KEY FUNCTIONS

The Rear Grommet is a two-piece weatherproof seal that protects the back of the camera during operation. The main grommet keeps the elements out at all times, while a smaller removable Power Insert allows you to connect an external power source when needed.

To connect a USB-C power source — such as a transformer or the AirTouch Solar Panel accessory — simply remove the Power Insert, feed the cable through the opening, and refit the grommet. The seal re-engages around the cable, maintaining the camera's IP rating.

*Mounting Bracket Warning

This product may be mounted on walls, eaves, or other suitable surfaces using screws, fixings, or suitable adhesive mounting solutions such as 3M tape.

If you prefer to drill-mount your camera, please ensure the correct tools and fixings are used and that installation is carried out carefully. Improper installation may cause damage to property.

The AirTouch Secure Range warranty does not cover damage to walls, surfaces, or property resulting from installation, mounting, removal, or use of this product. Installation is undertaken at the user's own risk. See page 9 or visit help.airtouch.net.au for a step-by-step installation guide.
